

ABC Data Summary Tool KEY

Program Year: 2011-2012

Person Completing Worksheet: Shawn Coyle Date: June 2012

Number of sites that pertain to this performance measure = 5

Number of sites with data = 3

Outcome Category: Improved academic engagement (60%)

Volunteer Station/Site	John Site	Harbor Site	Arc Site	Lyle Site	Monroe Site		Total
# Served	25	15	35	12	15		102
# Measured	20	Not available	Not available	10	15		45
# Met Target	13	Not available	Not available	7	10		30 or 67%
Summary Statement	<p><i>102 at risk high school students received tutoring/mentoring support during the 2011-2012 program year from the ABC Program. Outcome data were collected using each site's own instruments to determine improvements in participating students' academic engagement (i.e., school attendance, motivation, and/or homework completion) resulting from the support they received from ABC Program. Outcome data was available for a total of 45 students from three of five sites. Of the 45 students for which data were available, 67% of the students (30) showed improvement on at least one measure of academic engagement. This exceeds the projected target of 60%.</i></p>
